

Online Training programme on “Metagenomics Data Analysis” at ICAR-IASRI, New Delhi from January 19-24, 2022

Division of Agricultural Bioinformatics (DABin), ICAR-Indian Agricultural Statistics Research Institute (ICAR-IASRI) PUSA, New Delhi organized an online training on **“Metagenomics Data Analysis”** from **(19-24 January, 2022)** at ICAR-IASRI under the aegis of **ICAR Consortium Research Platform on Genomics**. 57 participants (55 from ICAR institutes and 2 from universities) attended the program in which there were 34 males and 23 females. There were 40 from Scientific Community and 17 contractual research staff (Young Professionals, Junior Research Fellows, Senior Research Fellows, Ph.D. Scholars and others) from various ICAR institutes and universities. In this training programme, lectures related to broad theme on (1) Metagenome extraction, its quality and quantity check (2) Sequencing technologies and platforms (3) Bioinformatics tools for processing of metagenome sequences for taxonomic and functional analysis and annotation (4) Metagenome binning through tools (5) Meta-transcriptome sequence analysis tools and (6) Simulation and visualization of metagenomics data were included.
